

DrMark Lombard

I want to be part of an organization that strives to unite all those who have a passion for surgery, all those, who in the midst of such uncertain times still believe in a better future for South Africa, a future where patients receive world class care - **IN SPITE OF POVERTY**. A future where the health - in its most holistic sense - of surgical registrars, MO's and interns alike, is **REVERED**. I feel a tremendous responsibility towards the community, with this platform and through the implementation of a few simple strategies, the dream of taking surgery to the people may be closer to fruition.
