

Dr Thozama Siyotula;

I'm currently a 2nd year registrar in general surgery at the University of the Witwatersrand. In the speciality of general surgery, I not only want to be qualified as a surgeon but would like to be a mentor as well as being involved in Academics and training. I'm passionate about growth, change and advancement in the field of medicine. Equal opportunities for patients, support for students - especially involving Academics (both at the post graduate and undergraduate level).I am hardworking, dedicated, driven and lead by example. I exemplify commitment and consistency. I am an excellent communicator and speaker. I find it easy to build and maintain relationships and have over the years built and continue to build a solid network within my field.This is what I can bring to the committee: new ways to present and conduct training, improvement of research and training material, improvement of efficiency and communication between members and committee of SASSIT, obtaining & monitoring feedback from members, expanding the scope of the organisation.
